Art Unit: 1712

This application contains claims directed to the following patentably distinct species of the claimed invention:

- 1) The photopolymerizable resins such as the 3,4-epoxycyclohexylmethyl-3,4-epoxycyclohexanecarboxylate of claim 8.
- 2) The photopolymerization initiators selected from Formulae (I) to (V) in claim 14 or 16 wherein X<sup>-</sup> is identified.
- 3) The curing agents such as the maleic anhydride of claim 9 or the polyethylene glycol of claim 10.
- 4) The compositions with and without the curing accelerator of claim 2, wherein if its presence is elected, a particular species thereof is revealed.
- 5) The compositions employed as either a paste of claim 22, a composite molding of claim 23, an adhesive of claim 24 or a coating of claim 25.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species within each of items 1) to 5) hereinabove for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-25 are generic.

A reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1712

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

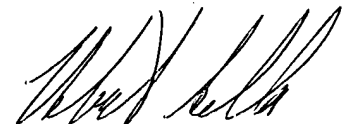

A telephone call was made to Stephen F. Adrian on September 21, 2001 to request oral elections to the above restriction requirement, but did not result in an election being made.

The reply to this requirement to be complete must include elections of the species to be examined even though the requirement be traversed (37 CFR 1.143).
